BIS Pipe Reinforcement and Bismat® 5000 Pipe Clamps

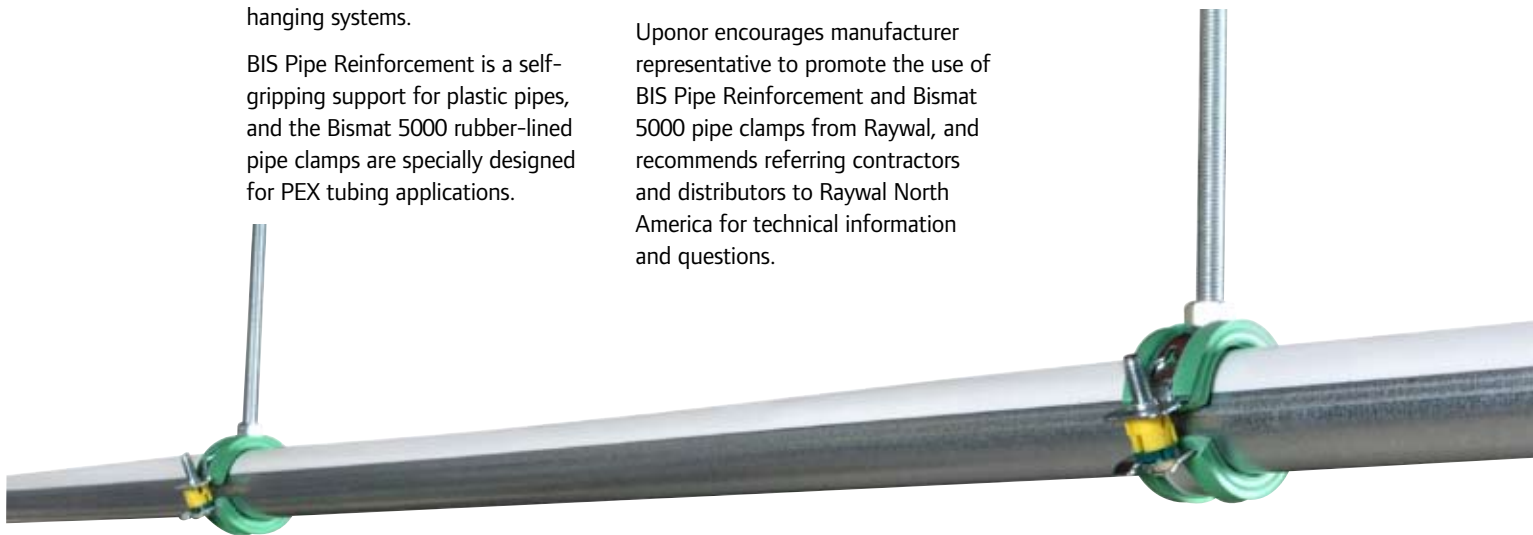

For crosslinked polyethylene (PEX) tubing hanging systems, Uponor recommends using BIS Pipe Reinforcement in conjunction with Bismat® 5000 rubber-lined pipe clamps from Raywal as an alternative to traditional PEX tubing hanging systems.

BIS Pipe Reinforcement is a self-gripping support for plastic pipes, and the Bismat 5000 rubber-lined pipe clamps are specially designed for PEX tubing applications.

Uponor has found the BIS Pipe Reinforcement and Bismat 5000 pipe clamps help ensure continuous, uninterrupted support, allowing placement of the PEX tubing hangers at the same intervals as with metallic pipes.

Uponor encourages manufacturer representative to promote the use of BIS Pipe Reinforcement and Bismat 5000 pipe clamps from Raywal, and recommends referring contractors and distributors to Raywal North America for technical information and questions.

For further information about Raywal, visit www.raywal-usa.com.
